

Mindset Training for Security and Safety

This Mindset Training is a two-hour Power Point presentation. This training is offered before or after receiving your Security Safety Audit Report that follows a Security Safety Audit conducted through the VSBIT Multi-Line program.

Many schools have scheduled this training during the school year for morning or afternoon in-service time. A break in the middle of this training is often requested.

This training is intended as either a single school or SU training for faculty, staff, reception, school nursing staff, school counselors, maintenance staff, and administrators. This training has been most beneficial as a single school community training that brings all staff and administrative personnel together concerning security and safety needs, goals, and understanding. Staff have remarked that this is a very helpful and non-threatening training.

This training addresses how All-Calls for threat situations blend with the latest options for All-Hazards and Options Based Response. This will include information concerning access control, security and safety by environmental design for classrooms and work areas, and security/safety education, prevention, and intervention. We will discuss preventing realistic threat issues, response options to those threats, and other related topics.

This presentation is designed as a hands-on facilitated training to assist your school community to come closer together in how security and safety is approached and understood at your school(s) and with your community partners. The training culminates with a "Sharing for Understanding" for any unclear issues. I will be there to facilitate and assist with these efforts.

The Mindset Training and Security Safety Audits services are offered to VSBIT Multi-Line members at no cost.

For further information concerning the Mindset Training or a Security Safety Audit, contact me through the information below or contact:
